

SLACFEST 2016

Activities • Food

Mug Caking

with Chloe & Kaitlyn • 12:00pm

We will be teaching an introductory “baking” class where people can learn how to make five different mug cakes! Because we are all college students, we made the recipes so a majority of the ingredients are cheap and readily available, so people can make them anytime they need a quick, sweet, snack!

Basic Baking

with Claire • 5:30pm

Do you love baked goods? Have you never baked before? Would you like to learn to make baked goods for yourself and your friends? Then this is the workshop for you! We'll be going over the basics of baking mechanics with cool tips and tricks to teach even the most kitchen.

Advanced Pattern Cookies

with Jessica Townsend • 3:30pm

Wow your friends with your cookie madness! In this workshop, you'll learn to create complex designs in slice-and-bake cookies through a process of slowly building up colored layers of dough. Start simple with checkerboards or spirals and work your way up to more complex designs. We'll bake off the cookies to serve with dinner.

Communal Dinner

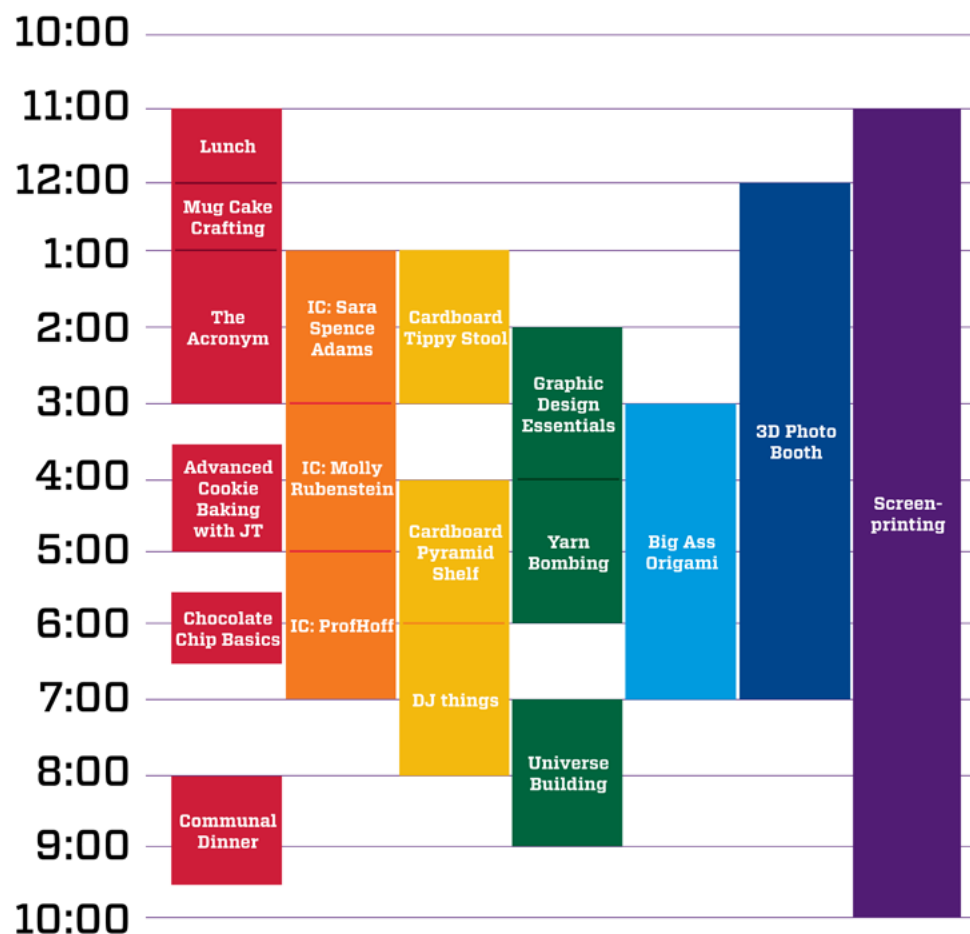

chefs: Chloe & Kaitlyn • 8:00pm

A tradition of SLACfest, there will be a communal, healthy, vegan dinner: cooked, prepared, and served by Olin students! A delicious way to end the day and reflect on all of the festivities. Menu included tofu stir fry, homemade soup, handcrafted rolls, and fresh salad.

SLACFEST 2016

SCHEDULE

SLACFEST 2016

Workshops • Skillshares

Yarn Bombing

with Allison • 4:00pm

Help make a fun, brightly-colored yarn-bombing installation for the Olin Library! No knowledge of knitting is required! (Google yarn bombing if you don't know what it is!)

Cardboard Furniture

with Lauren • 1:00 & 4:00pm

Make either a cardboard Tippy Stool or Pyramid Shelf. Learn how to use triwall cardboard to make awesome stable furniture. No experience is required! Take home a new addition to your dorm room!

Interesting Conversations

1:00 & 3:00 & 5:00pm

Join us throughout the day as we have interesting conversations with some of our favorite faculty members, including Sarah Spence Adams, Molly Rubenstein, and Aaron Hoffman! There will be snacks!

Universe Building

with Kai Austin '15 • 7:00pm

Every character wants something, even if it's only a glass of water. But is that what your character needs? A product of a culture which has shaped their thoughts, their values, their hopes, their fears -- the foundation of every story starts with a simple question: How does it begin? Come and join in to help create a collaborative tale on another world using science, imagination, and a little UOCD.

Graphic Design

with Gabe Diaz-Barriga • 2:00pm

Like reading and writing, graphic design is a universally invaluable skill. Graphic design can help you communicate your message more clearly and concisely. It is especially important in the modern world when we are inundated with images and messages and when the tools to do graphic design are so widely available. But what exactly is graphic design? Why should an engineer or businessperson care? How do you become a good graphic designer? What tools do you need? In this short lecture I will answer these questions and introduce you to the basics of graphic design theory.

Big Ass Origami

with Nur & Scott • 3:00pm

We will be folding 9x9ft paper into various fascinating creations that will challenge your sense of scale and space. You will learn to be good with lines and angles. And maybe acrylic spray finishes.

3D Photo Booth

with your 3D Ninjas • 12:00pm

In the 3D scanning booth, we'll show you how the Replicator Space Kinect works by 3D scanning you and sending you the file, which you can edit and 3D print as you wish for whatever reason your heart desires. The 3D scanner is an underutilized resource in the Replicator Space, and we hope you'll see how it can be used! We have the capabilities to do bust scans, full body scans, and potentially multiple person scans!

Screen Printing

with Saarth & Doyung • 11:00am

Sign up in groups of up to 10. Every hour, we will work with a group to screen print posters! It will be beneficial to have some designs in mind before coming to screen print. Take home an awesome custom poster!
